

STOP THE ATTACKS ON GAZA

ISRAEL HAS NEVER STOPPED ATTACKING GAZA.

During Operation Cast Lead, 2008-9, Israel killed 1400 Palestinians in Gaza, most of them civilians. Since the end of Operation Cast Lead, Israel has continued regular attacks on Gaza, killing 271 Palestinians between February 2009 and October 2012. Palestinians have responded with rocket fire, killing 5 Israeli civilians over the same period. (www.btselem.org)

ISRAEL BEGAN THE CURRENT ESCALATION OF VIOLENCE.

On November 5, Israeli soldiers shot and killed an unarmed Palestinian man in Gaza. On November 8, Israeli soldiers fired indiscriminately into villages and killed a 13 year old boy. Palestinians in Gaza responded with rocket fire. Israel attacked again on November 10, killing several more Palestinians.

ISRAEL BROKE ANOTHER TRUCE.

Egypt helped arrange a truce on November 13. On November 14, Israel broke the truce with the extrajudicial murder of a Hamas military officer. Palestinians have responded with rocket fire, and Israel is mounting a full-scale land invasion along with bombing attacks.

ISRAEL STILL HOLDS GAZA UNDER ILLEGAL SIEGE AND BLOCKADE.

Israel controls Gaza's airspace, water, electricity, seacoast, borders (in collaboration with Egypt), imports and exports. Gaza has become an open-air prison for 1.5 million Palestinians.

***END THE SIEGE AND BLOCKADE OF GAZA.

REMEMBER GAZA

Four years ago, December 27 2008,

Israel launched a military assault on the captive population of Gaza, killing over 1400 Palestinians, mostly non-combatants and including over 400 children. Illegal weapons such as white phosphorous were used. Over 5000 Palestinians were injured, and much of Gaza's infrastructure and agriculture were destroyed. 13 Israelis were killed, 4 of them by Israeli fire.

BEFORE THAT, on November 4 2008, Israel violated an ongoing ceasefire by invading Gaza and killing 6 Palestinians. Palestinians responded by firing rockets, causing no casualties. Israel used this as pretext for a military assault.

BEFORE THAT, on June 19 2008, Israel agreed to a 6-month ceasefire with Hamas. The terms were that Hamas would stop firing rockets into Israel, and Israel would stop all incursions and reduce its starvation blockade on Gaza. **Israel never fulfilled its obligations under the truce.** The starvation blockade continued, but only after the November 4 invasion and murder of Palestinians did Hamas resume rocket fire.

BEFORE THAT, in 2005, the Israeli government removed illegal settlers and military from Gaza, but maintained control of Gaza's borders, airspace, water, electricity, seacoast, imports and exports. **Still effectively occupied by Israel, Gaza has been reduced to an open-air prison for 1.5 million Palestinians.** Ethnic cleansing, in the form of illegal Israeli settlements, continues in the West Bank.

BEFORE THAT, in 1967, Israel occupied Gaza and the West Bank and began displacing Palestinians for illegal Jewish-only settlements.

BEFORE THAT, in 1948, Israel was founded by the ethnic cleansing of 800,000 Palestinians, many of whom were driven out to become refugees in the Gaza Strip.
